

DEEKENDRA KUMAR

Android Developer | Kotlin | MVVM | Flutter

deekendra0796@gmail.com | +91-9098284997 | Raipur, India | Immediate Joiner

PROFESSIONAL SUMMARY

Expert Android Developer with 6+ years delivering scalable production apps using Kotlin, MVVM, Clean Architecture, Hilt, StateFlow, Room, and Jetpack Components. Built real estate apps for internal agents (AX Capital), Mozzingo (roadside assistance - customer/mechanic matching), Dileep Tailors (100K+ downloads - tailoring EdTech), healthcare (Diagnorays), fitness, and matrimony apps for multiple clients. Specialized in Accessibility Services for call tracking/recording, real-time chat, and live location tracking. Production-ready Flutter cross-platform experience. Proven debugging, performance optimization, and global client collaboration skills. Available for immediate onsite/remote opportunities.

SKILLS

Primary: Kotlin, Android SDK, MVVM, Clean Architecture, Jetpack Components, StateFlow, LiveData

Cross-Platform: Flutter, Dart — iOS & Android

Architecture: MVVM, Clean Architecture, Repository Pattern, Offline-First

Async: Kotlin Coroutines, StateFlow, SharedFlow, LiveData

Networking: Retrofit, REST APIs, JSON Parsing, API Optimisation & Error Handling

Database: Room, SharedPreferences, Firebase Realtime Database

Dependency Injection: Hilt, Dagger

Background: WorkManager, Foreground Services, Broadcast Receivers

Maps & Location: Google Maps API, FusedLocationProviderClient, Live Location Tracking

Firebase: FCM Push Notifications, Realtime Database, Cloud Messaging

UI: XML, ViewBinding, Material Design, Responsive UI/UX

Testing & Debug: Unit Testing, Mockito, Memory Leak Detection, Android Studio Profiler, LeakCanary

Tools: GitHub, Gradle KTS, Android Studio, Play Console, App Signing, Store Optimisation

PROFESSIONAL EXPERIENCE

Android Developer — AX Capital

Nov 2023 – Mar 2026

Dubai, UAE (Remote)

- Developed multiple internal production applications for real estate agents and business operations.
- Built property listing, lead management, contacts, and calendar systems improving agent productivity.
- Designed and implemented agent dashboard with real-time data visualisation.
- Built call tracking & recording system capturing call logs and audio using Accessibility Services — technically challenging given Android 9+ restrictions on call recording APIs.
- Implemented live location tracking system for field agents using FusedLocationProviderClient with adaptive battery-efficient update intervals inside a Foreground Service.
- Developed real-time WhatsApp-like chat application with lead interaction, listing sharing, and read receipts using Firebase Realtime Database.
- Architected all apps using MVVM + Clean Architecture, Hilt for DI, Room for local caching, and StateFlow for reactive UI.

Flutter Developer — Siliconkraft Tech Pvt Ltd

Jan 2022 – Feb 2023

Bangalore, India

- Built cross-platform iOS and Android e-commerce white-label applications using Flutter and Dart for multiple international clients.
- Developed scalable, reusable feature modules supporting different client business requirements on both platforms.
- Wrote detailed technical specifications and maintained documentation throughout the project lifecycle.
- Collaborated across design, QA, and product teams to ensure performance, quality, and timely delivery.

Android Developer — Sachirva Technology Solution

Jul 2021 – Jan 2022

Bangalore, India

- Collaborated with QA, product management, design, and support teams across all phases of app development.
- Wrote well-designed, efficient Kotlin code following MVVM architecture and best practices.
- Contributed to improving application performance, stability, and overall user experience.

Android Developer — Fitnytech Technology

Aug 2018 – Jul 2021

Bangalore, India

- Built and maintained fitness and education applications used by thousands of users.
- Developed multiple client apps using Kotlin and Java with full lifecycle ownership.
- Improved performance and stability — reduced app crash rate and optimised memory usage.

Android Developer Intern — Jain Software

Jan 2018 – Jun 2018

Raipur, India

- Assisted in Android app development and feature implementation under senior developer guidance.

RELEVANT PROJECTS

- **Dileep Tailors (100K+ downloads)** - Built educational e-commerce app with blouse cutting tutorials, HD stitching videos, and chart pattern sales for professional tailors.
- **Mozzingo (Customer + Mechanic Apps)** - Built on-demand roadside assistance platform with location-based mechanic matching, service booking, and real-time tracking for bikes/cars.
- **ParinaySamriddhi** — Full-stack matrimonial app with profile matching, chat features, and live on Play Store.
- **Diagnorays** — Healthcare test booking app with clinical lab integration and live delivery partner tracking system.
- Delivered 10+ custom Android apps across real estate, healthcare, and SMB domains with full lifecycle ownership.
- Leverage GitHub Copilot, Google Gemini (Android Studio), JetBrains AI Assistant, ChatGPT, Claude, and Perplexity for 2x faster development cycles while ensuring production code quality.

EDUCATION

Bachelor of Engineering (B.E.)

CSVТУ University | 2014 – 2018
